

Please leave satellite radio alone! The local stations here in Buffalo have been unresponsive to listeners needs. We've lost too many good stations to achieve some vague corporate aim or please someone's polling survey. We have no beautiful music or intelligent programming. XM Satellite Radio to the rescue! It has all the great variety of programming I like without the commercialism. I don't have to listen to the same music over and over again. I miss WBNY and WEBR'S Sound of the City, but no one wants to bring them back. XM Satellite Radio gives me some of that back; I can listen to weather reports in Florida and California rather than have them talk about SNOW everyday in Buffalo. I'm willing to pay for this service...that's how much I miss it!

Reject NAB'S petition so we can listen to some really good and responsive programming!

Thank you very much.
